

Planetary Geology 4460

Homework #2

Due Friday Sept. 15, 2017

#1 Condensation Models vs. Bowen Reaction Series (20 points) Using the following diagrams, compare the Bowen reaction series and the Equilibrium Condensation model. Mark using numbers or some other code what identical or at least very similar solids occur in both diagrams. Beyond marking your diagrams, in at most ½ page of text describe in what ways the condensation sequences are similar and in what ways they are different.

From Deitrich & Skinner 1979
