1 - Please comment on the Ye Zhang's teaching effectiveness, assignments, materials used in the course, methods (what was done best, as well as what can be improved) and anything else about this course.

Return Rate	6/9 (66.67%)

• Material is full-breadth and extensive. Grading policies and assignments are tough but fair. The assignments are strongly relevant to understanding basics of modeling in groundwater transport phenomenon.

• I think the subjects that involved are important for my future study or work.

• Ye is obviously an extremely smart and knowledgeable professor. However, sometimes she had a tendency to rush through the material. That being said, she was always willing to slow down, answer questions, etc. if a student asked her.

• Dr. Zhang was an effective instructor with a teaching style I appreciated. She was thorough and displayed genuine interest in helping us understand the topics presented.

• She is very professional, the materials in the course are excellent. This class and Dr.Zhang is really helpful and perfect.

• Projects were good assignments to get some actual modeling experience. The lectures contain a lot of information, some of which is never used in the class.
